

# Medication Monitoring Policy for Phentermine

At Charlotte Weight Loss and Wellness Clinic, your safety is our highest priority.

For patients who are prescribed **phentermine** or any other controlled prescription weight loss medication, we follow strict medical and regulatory guidelines to ensure safe and appropriate use.

As part of this policy:

- A **urine drug screening** is required **at the start of treatment**.
- **Random urine drug tests** may also be performed **as needed (PRN)** during your treatment.

Urine drug testing is a standard practice designed to:

- Promote safe prescribing,
- Support successful outcomes,
- Comply with state and federal guidelines.

## **Cost Information:**

The self-pay price for each urine drug test is **\$50**.

(This cost may not be covered by insurance.)

## **Important Notice:**

Refusal to complete required drug testing **may result in not being started on phentermine or in discontinuation of the medication** if already prescribed.

We are committed to partnering with you to support your health, safety, and success on your weight loss journey!
